

# Two-way Counter Intercom System

## DESCRIPTION

The Two-way Counter Intercom System provides clear voice transmission and is easy to install, making it ideal for environments where communication through barriers is necessary. It is specifically designed to amplify voices, ensuring clear and intelligible conversations through counter windows, glass partitions, or similar setups. This system is widely used in locations such as box offices, banks, offices, control points, private access points, car parks, and other areas where effective communication through physical barriers is crucial for smooth operations. With its user-friendly design and reliable performance, it enhances communication efficiency in various professional settings.

## FEATURES
