

Conference Microphone Power Extender

DESCRIPTION

The NVS-DC600267PE is a versatile microphone battery charger designed to safely and efficiently power conference units. It supports connection to a 4-way power supply, delivering up to 350 watts of power. This charger not only provides reliable electricity but also enhances the signal quality for connected devices, ensuring optimal performance during conferences and meetings. Its robust design guarantees both safety and convenience, making it an essential component for maintaining effective communication systems.

FEATURES

- ⦿ Meets international standards for quality and safety in conference systems
- ⦿ Engineered to deliver dependable power to both microphone and voting units
- ⦿ Accommodates multiple devices with a combined power output of up to 350 watts
- ⦿ Provides real-time status updates and alerts users to any faults
- ⦿ Ensures consistent and optimal performance for connected conference equipment

Specifications

Model	NVS-DC600267PE
Power Supply	AC100-240V/50-60HZ
Power Output	2W
Input Interface	8-pin DIN x 1
Dimensions	280*255*140 mm
